

Your Project, Step by Step.

10 STAGES FROM FIRST CALL TO LAUNCH

1

Discovery Call

A 30–45 minute conversation where we learn everything about your business, your goals, and what success looks like. No pitch — just listening.

2

Proposal

We send a detailed scope document outlining every page, every feature, the timeline, and the investment. You review, ask questions, and approve.

3

Contract + Deposit

The agreement is signed and the first payment (50%) is made. This is our green light. Work does not begin until both are complete.

4

Content Collection

You provide all copy, photos, and brand assets. We give you a checklist and a deadline. This phase sets the pace for everything that follows.

5

Design

We build out the visual direction — layout, typography, color, imagery. You review and give feedback before a single line of code is written.

6

Development

Your approved design gets hand-coded into a real, fast, responsive website. Every page. Every interaction. Built from scratch, no templates.

7

Internal Review

Before you see anything, we test everything ourselves — mobile, forms, links, speed, and cross-browser. We catch our own mistakes first.

8

Client Review

We send you a private staging link to click through. You have two rounds of revisions included. Feedback is collected and applied.

9

Final Approval + Payment

You sign off on the finished site. The final invoice (50%) is due before launch. Once cleared, we're ready to go live.

10

Launch + Handoff

Your domain is pointed, the site goes live, and we walk you through everything. You're handed the keys to your new online home.
